Summary

I am a graduate of Durham College in Oshawa, currently living in the GTA. I am pursuing a position as a Front-End Web Developer. Since graduating, I have dedicated myself to learning front-end technologies such as React, JavaScript, and SASS, as well as mastering tools like Git and Figma. I am highly motivated, disciplined, and committed to the continual improvement of my skills. I am career-oriented and looking for an opportunity to build my career while contributing to the industry.

As a prep cook at Ancaster Mill, I collaborated with my team to efficiently prepare for a weekly event serving approximately 500 guests. This position demanded meticulous planning, organization, delegation, discipline, and initiative. My responsibilities included overseeing food preparation, ordering supplies, organizing our workspace, and timing our processes. Additionally, I gained valuable experience working as part of a 10+ member team in various event catering roles, including dish preparation and plating. I also collaborated with a front-of-house team of over 20 staff members to ensure successful event execution.

My goal is to develop my skills as a software developer further and launch my career in the software development industry.

- Assisted senior kitchen staff with meeting demands of fast-paced kitchen operations
- Collaborated in a team of 10+ catering to large scale 100+ person events such as weddings, banquets, baby showers, business meetings ensuring everything we output meets our high standard

Merchandiser / Cashier June 2017 - March 2023

Shoppers Drug Mart, Various Locations (5 Years, 9 Months)

- Assisted in developing and receiving orders exceeding 10+ skids of product
- Delegated tasks amongst junior team members to complete task lists to meet strict deadlines
- Implemented and executed plan-o-grams in-line with store presentation guidelines
- Performed comprehensive stock checks to maximize product sales
- Prioritized task load with minimal supervision and sound judgment
- Trained new employees on store functions

Projects

Portfolio Website — Ben-Langlois.github.io/Portfolio/

- React-based webpage displaying resume information and projects hosted through Github Pages.
- Built using SASS without a library.

Photography Portfolio — Ben-Langlois.github.io/Photography-Portfolio/

- React app showcasing personal photography with user-friendly filtering options.

Weather App — bens-weatherapp.live/

- React-based weather dashboard utilizing multiple APIs and SASS for a clean UI.

3D Sandbox — https://codepen.io/ben-langlois/pen/zYegMzB
- A 3D interactive web app built using React, Three.js, and Jquery.

Temperature Converter — codepen.io/ben-langlois/details/jOdwMRz
- React-based temperature converter utilizing SASS and TailwindCSS.

Lab Timer — codepen.io/ben-langlois/full/wvqKwRL
- React timer developed to aid a Ph.D. student's thesis research, monitoring paces at different speeds.

Notes App — codepen.io/ben-langlois/pen/JjJrJqK
- React app allowing creation and deletion of notes.

Education

Durham College, Oshawa 2018 - 2020

Advanced Diploma, Computer Programming

Skills

Industry Knowledge
- Front-End Development
- UX/UI Development
- Version Control
- SDLC

Technical Skills
- ReactJS
- JavaScript
- HTML/CSS
- SASS
- Git
- JQuery
- TailwindCSS

Soft Skills
- Fast Learner
- Detail Oriented
- Time Management
- Collaboration
- Disciplined
